

SAFETY ENGINEER

The consultancy company INSAFE is specialized in safety of machinery. To develop our technical department, we are looking for an engineer. The candidate will be hired by SLM Srl, a company of the INSAFE group, based in Alzate Brianza (CO) - ITALY.

Description

The candidate is a mechanical or electrical or chemical or in automation or materials engineer. He/she will be trained in the working method in use at the company: the job involves an initial phase of drafting technical documentation for industrial machines, which will be followed by an inspection/validation phase, and only when the appropriate technical/relational skills have been acquired will he/she carry out consultancy activities.

Responsibilities

Depending on career advancement, the candidate will be responsible for:

- Correct document drafting;
- Correct analysis in accordance with the relevant standards;
- Correct risk assessment as required by the standards
- Instrumental measurement activities (phonometry, electrical tests, etc.)
- Verification and/or validation activities (from field measurements to fault simulation activities);
- Supporting the client's technicians in order to guide them in the correct selection and implementation of appropriate risk reduction measures.
- Initially, the technician will be supported by a senior company contact person, with the aim of being autonomous in short time.
- He/she will need to acquire/have good interpersonal and time coordination skills, to fulfil customer deadlines and achieve company objectives.

Qualifications

- Bachelor's degree.
- Ability to read and understand a technical drawing.
- Ability to read and understand an electrical/pneumatic/oleodynamic/software diagram.
